Watch the video on how to review EXIF data in Autopsy first!

Photo analysis

We've been asked to review the photos of user John Tomas. HR has provided a BIT-Stream copy of his USB drive (John Thomas Photo USB.Rar). Extract The John Tomas case and import it into Autopsy like you have other cases. You must let all Autopsy ingests load – this is the progress bar in the bottom right corner. It will take a bit of time to complete. Your import should look like the image below.

Use a red colored font for our answers below

Photo 1

1. What Phone type took this picture? iPhone 5s
2. When was the picture taken? 2014:06:07 16:47:07
3. Was the picture taken with the front or back lens? Back lens
4. What were the GPS coordinates of the camera/phone when the picture was taken?
   Latitude: 42.727000000000004
   Longitude: -78.81374444444444
5. Put the coordinates into Google Maps and screengrab the map?
   298-112 Sherburn Dr, Hamburg, NY 14075
6. What other photos were taken with the phone within 1 year (timeline)? One photo was taken in 2015.
   - Note – notice within the timeline we could look at many things. Web activity on the phone, downloads, etc. Under Misc Types – we could get GPS routes, location history, and email.
   - We're not looking for items outside of the photo in this exercise, but make sure you understand the tool for future casework.

Photo 2
