2 Executive Summary

Sarah Miles has been found dead in her apartment and police suspect foul play. David Banner, Sarah's boyfriend of 2 years, is a suspect and you have been asked to perform a digital investigation of the provided USB image. The USB was found in David's apartment, and a forensic copy has been made for your review. The USB and original image are under police control, and the chain of custody is intact. The police suspect David may be involved as he was heard arguing with Sarah the night before she was found.

Nature of the case: Suspicious death

6.0 The evidence discovered on this USB device from Sarah's case suggests that it was a premeditated action against Sarah. The motivation behind this appears to be financial gain, as we have identified Sarah's assets deleted from the device, including her savings, stocks, and life insurance value. Based on my expert opinion, substantiated by the evidence, it is highly unlikely that Sarah's case was a suicide; rather, it appears to have been a planned murder.
